

Inventor Develops System to Preserve the Tires of Trailers (TOR-9767)

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the Wagner Trailer Saver System, to applicable companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) October 19, 2017 -- An inventor, from St. Catherines, Ontario, Canada, thought there could be a safe and effective way to improve lateral mobility for the tires of multi-axle trailers when making sharp turns, so he invented the patent-pending WAGNER TRAILER SAVER SYSTEM.

The WAGNER TRAILER SAVER SYSTEM provides an improved way to protect and preserve trailer tires. In doing so, it enhances safety and it could help to prevent accidents. As a result, it provides added peace of mind. The invention features an effective design that is convenient and easy to use, so it is ideal for trucking companies and fire departments. Additionally, the WAGNER TRAILER SAVER SYSTEM is producible in design variations, and a prototype is available.

The inventor described the invention design. “My design helps to prevent wear and tear on tires, rims and wheel bearings, and stress on trailer frames.”

The original design was submitted to the Toronto office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-TOR-9767, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
