

## **Inventor Develops Convenient Automotive Tool (BGF-2073)**

*InventHelp, a leading inventor service company, is working to submit Auto Repair Helper Tool to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) October 23, 2017 -- "I was looking for an easier way to replace a seal," said an inventor from Riverview, Mich. "I could not find a tool on the market that met this need, so I came up with my own idea for how to replace seals quickly and easily, and without having to drop the whole transmission."

He created a prototype for the patent-pending Auto Repair Helper Tool to help insert seals for transmissions. The tool allows seals to be inserted without having to drop the transmission. It is also usable with rear-end seals. The device ensures that seals are not damaged during placement onto the vehicle. The accessory replaces seals in a single step. Furthermore, the invention is designed to save time, effort and money.

The original design was submitted to the Bingham Farms office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-BGF-2073, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
