

## **Inventor Develops Lug Nut Cleaning Tool (NAV-130)**

*InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the Nut Wand, to applicable companies for their consideration.*

PITTSBURGH ([PRWEB](#)) October 24, 2017 -- An inventor from Nashville, Tenn., has developed the NUT WAND, a hand-held tool for cleaning the recessed lug nuts on certain automobiles and light trucks.

"I was inspired to develop a product that would be beneficial to me and others. As an automotive enthusiast, I thought there had to be an easier way to clean recessed lugs on vehicles, so I created my invention," said the inventor. The NUT WAND provides quick and easy access into this cramped location and enables countersunk lug nuts to be effectively cleaned. It will remove dirt, dust and grime from the outside of the lug nut. This new tool will reduce time and effort required to clean the wheels.

The original design was submitted to the Nashville office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-NAV-130, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
