

## **Invention Prevents Babies and Pets from Being Left behind in Vehicles (SFO-164)**

*InventHelp, a leading inventor service company, is working to submit Save a Baby/Pet to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) October 25, 2017 -- PITTSBURGH...An inventor from Oakland, Calif., thinks it's high time to combat a horrible trend. "Too many babies are forgotten in vehicles and end up perishing because of this tragic mistake," he said. Concerned about this very serious issue, he decided to develop a way to prevent such senseless fatalities.

SAVE A BABY/PET helps prevent a child or pet from being forgotten in a vehicle. It's designed to eliminate danger and the chance of fatality by keeping the driver from walking away from the vehicle in ignorance. As a result, it promotes safety and peace of mind.

Featuring an easy-to-use design and producible in different sizes and colors, the system can be added to existing vehicles or pre-manufactured on new vehicles.

The original design was submitted to the San Francisco office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-SFO-164, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
