

Inventor Develops Versatile Beverage Holder (FRO-492)

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Drink Stabilizer, in the hopes of a good faith review.

PITTSBURGH ([PRWEB](#)) October 25, 2017 -- "I could not find a beverage holder that would fit in my car," said an inventor from Fresno, Calif. "This led me to develop a universal beverage holder that could be used in vehicles, as well as strollers and elsewhere."

She created a prototype for the DRINK STABILIZER to conveniently hold a beverage in the upright position. The device prevents the beverage from swaying or tipping. This ensures that the drink does not spill while in transit. The unit thereby provides added peace of mind. It is suitable for use in vehicles, strollers and elsewhere. Additionally, the device is designed to be lightweight and easily washable.

The original design was submitted to the Fresno office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-FRO-492, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
