

Inventor Develops Comfortable Forward-Facing Car Seat (HUN-289)

InventHelp, a leading inventor service company, is working to submit Sweet Sleep to companies for their review.

PITTSBURGH ([PRWEB](#)) October 25, 2017 -- PITTSBURGH..."I would look in the back seat at my grandchildren sleeping in their car seats, and I would see how their heads were slumped to the side," said an inventor from Channelview, Texas. "This looked highly uncomfortable, which led me to design a car seat that is more supportive."

She created a prototype for the SWEET SLEEP to offer enhanced support for the head and neck and back. The design prevents the head from slumping forward, backward or to either side. This enables the child to sleep more comfortably and soundly, as it alleviates aches and pains caused by improper sleeping position. The seat makes long car trips more enjoyable. In addition, it provides added peace of mind.

The original design was submitted to the Houston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-HUN-289, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
