

Safer, More Comfortable Children's Car Seat Invented (NAV-1095)

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the Lazy Booster, to applicable companies for their consideration.

PITTSBURGH ([PRWEB](#)) October 26, 2017 -- As a nurse an inventor from Crossville, Tenn., is especially aware of children's comfort and safety, so she wants to ensure that comfort and safety while they ride in car seats. "That's why I came up with the LAZY BOOSTER," she said.

This modified car seat improves the safety and comfort of a sleeping child in a car seat. It supports his or her head, as well as helps prevent asphyxiation. Overall, it promotes peace of mind for parents and guardians.

Ergonomic, versatile and featuring an easy-to-use design, the patent-pending LAZY BOOSTER serves as a more convenient alternative to conventional children's car seats.

The original design was submitted to the Nashville office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-NAV-1095, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
