

Inventor Develops Plow to Clear Windrows (TOR-9747)

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Windrow Plow, in the hopes of a good faith review.

PITTSBURGH ([PRWEB](#)) October 27, 2017 -- "When snowplows go by, they leave snow windrows behind that block in parked cars and driveways," said an inventor from Woodbridge, Ontario, Canada. "In order to provide an efficient way to plow these troublesome windrows, I came up with this specialized plow."

He created a prototype for the WINDROW PLOW to allow windrows to be plowed with a backhoe. The unit provides a faster, more efficient way to clear windrows from streets. The device ensures that vehicles and driveways are not blocked in. The accessory saves time and effort. In addition, the invention is designed to be cost-efficient, low-maintenance, easy to operate and economical.

The original design was submitted to the Toronto office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-TOR-9747, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
