

Modified Seat Belt Is Easier to See for Law Enforcement (CLM-295)

InventHelp, a leading inventor service company, is working to submit Neon Safety Harness to companies for their review.

PITTSBURGH ([PRWEB](#)) October 31, 2017 -- It can be difficult for police officers to determine if people in vehicles are wearing their seat belts, and they often have to approach the vehicles in order to see. "In order to solve this problem I came up with this idea," said an inventor from Albany, Ohio.

The NEON SAFETY HARNESS enables a police officer to see if a vehicle's occupants are wearing their seat belts. It eliminates the need for guesswork, pullovers or erroneous penalties. As a result, it saves time and effort.

Designed to promote convenience, safety and peace of mind, the NEON SAFETY HARNESS serves as an alternative to conventional seat belts, and it's ideal for all vehicle owners.

The original design was submitted to the Columbus office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-CLM-295, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
