

## **Inventor Develops Vehicle Cleaning System (TPA-2492)**

*Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Self Cleaning Car Genie, in the hopes of a good faith review.*

PITTSBURGH ([PRWEB](#)) November 01, 2017 -- "My wife and I were having trouble keeping our vehicle clean we are busy parents who often drive children around to school, soccer or elsewhere," said an inventor from Tampa, Fla. "I came up with this cleaning system to provide an efficient way to keep the interior tidy."

He developed the SELF CLEANING CAR GENIE to provide a convenient way to vacuum the vehicle interior. The system ensures that the floor, seats, upholstery and other surfaces remain neat and tidy. It eliminates the need to pay to use the vacuums at gas stations and detailing centers. The device saves time and effort with its easy-to-use design. It offers added peace of mind. Additionally, the invention is adaptable for use with any new or existing vehicle.

The original design was submitted to the Tampa office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-TPA-2492, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
