

## **Inventors Develop Brush for Cleaning Automobiles (HLW-1845)**

*InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the Auto and Wheel Brush, to applicable companies for their consideration.*

PITTSBURGH ([PRWEB](#)) November 01, 2017 -- PITTSBURGH...Two inventors from Miami, Fla., thought there needed to be a better and faster way to clean all of the surfaces of a wheel's rim, including the inside of the rims, as well as the intricate grooves and crevices, so they invented the AUTO AND WHEEL BRUSH.

Ideal for both individual users and professional car wash operations, the patent-pending AUTO AND WHEEL BRUSH provides a faster and more effective way to clean a vehicle's rims and offers an improved alternative to traditional cleaning methods. It does not scratch or damage rims' surfaces like many other brushes can, and it ensures that all the surfaces of the rim are properly cleaned, inside and out. Convenient, easy to use and cleverly but simply designed, it also includes an integrated lug-nut cleaner that allows for simultaneous cleaning of and around lug nuts.

The unique all-in-one tool design actually works. There's no need to buy multiple cleaning tools. It allows for fast, effective and efficient cleaning, cleans large surface areas quickly and cleans tight areas. Overall, it saves time and effort, and encourages better rim maintenance. Additionally, the AUTO AND WHEEL BRUSH is producible in design variations.

The inventors described the invention design: "Our design makes it very easy to clean rims and eliminates the need for multiple cleaning tools."

The original design was submitted to the Hollywood office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers.
