

Inventor Develops Aid to Transport Groceries (LGI-2325)

InventHelp, a leading inventor service company, is working to submit Car Cart to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) November 09, 2017 -- PITTSBURGH...An inventor, from Flushing, N.Y., thought there needed to be a way to eliminate strain when transporting groceries, so she invented the CAR CART.

The CAR CART provides an effective way to store and transport groceries and other items. In doing so, it offers an improved alternative to traditional bags and carts. As a result, it saves time and effort, and it enhances maneuverability. The invention features a durable design that is convenient and easy to use, so it is ideal for households. It's also usable for laundry, beach supplies, picnic/BBQ supplies, gardening supplies, etc. Additionally, the CAR CART is producible in design variations.

The inventor described the invention design. “My design helps to simplify the grocery shopping routine.”

The original design was submitted to the Long Island office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-LGI-2325, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
