

## **Vehicle Safety Alert System Invented (BRK-2286)**

*Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Proud American Security System, in the hopes of a good faith review.*

PITTSBURGH ([PRWEB](#)) November 09, 2017 -- An inventor from Decatur, Ala., has developed the patent-pending PROUD AMERICAN SECURITY SYSTEM, an advanced automotive feature designed to enhance personal security and safety. This system helps to keep a driver in control of the situation if being carjacked, abducted or threatened by another person.

"I was inspired to create this safety system after watching the local news and seeing an elderly woman fighting off a criminal. I invented this system as a means to alert authorities quickly and provide safety to the victim," said the inventor. The PROUD AMERICAN SECURITY SYSTEM allows police to quickly and easily close in on a criminal. It helps to get criminals off the streets and will serve as a deterrent against carjackings. The system provides video evidence for use in the court system. In addition, it will provide peace of mind to motorists living in high-crime areas.

The original design was submitted to the Birmingham office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-BRK-2286, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
