

## **Inventor Develops Hands-Free Mobile Phone Accessory (POO-282)**

*Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Seatbelt Clip, in the hopes of a good faith review.*

PITTSBURGH, PA ([PRWEB](#)) November 13, 2017 -- PITTSBURGH..."I travel frequently and need to be on the phone while driving, so I had a wireless system installed in my vehicle so that I could talk hands-free," said one of two inventors from Portland, Ore. "Unfortunately, it is difficult to hear and hold conversations, which led me to develop my solution."

They developed the patent-pending SEATBELT CLIP to position the phone close to the ear and mouth. This makes it easier to have hands-free conversations. It eliminates the need to connect to a wireless speaker system. The device ensures that you can hear the caller clearly and that they can hear you as well. It is adaptable for use in any vehicle. In addition, it adjusts to accommodate any phone.

The original design was submitted to the Portland office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-POO-282, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
