

Alternative Drunk-Driving Prevention Invented (HUN-392)

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, B.A.C. Sensor, in the hopes of a good faith review.

PITTSBURGH, PA ([PRWEB](#)) November 14, 2017 -- PITTSBURGH...Current methods of avoiding drunk-driving incidents don't seem to be working as much as they should, so an inventor from Houston, Texas, decided to develop the idea for a more reliable way to prevent a drunk person from endangering others with a vehicle.

The patent-pending B.A.C. SENSOR provides a reliable way to reduce drunk driving by preventing a drunk person from even starting a vehicle. It also ensures that the person gets home. Overall, it helps avoid accidents, injuries and fatalities.

Designed to promote safety and peace of mind, the B.A.C. SENSOR is compatible suitable for all vehicles and beneficial to all drivers.

The original design was submitted to the Houston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-HUN-392, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
