

Motorcycle Security System Invented (DLL-3267)

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, R & J's Moto-Alert, in the hopes of a good faith review.

PITTSBURGH ([PRWEB](#)) November 15, 2017 -- PITTSBURGH...Motorcycles are expensive and require a great deal of responsibility on behalf of the owner in a financial capacity as well as a regular maintenance schedule. Because they tend to be so expensive, many motorcycle owners consider their vehicle to be one of their most prized possessions.

An inventor from Arlington, Texas, has invented R & J'S MOTO-ALERT, a security system for motorcycles that automatically alerts the owner if a theft was occurring. "I bought a security camera and chains with a lock for my motorcycle, but still did not feel comfortable leaving it alone," said the inventor. "With this invention, I would have greater assurance that it is safe."

R & J'S MOTO-ALERT provides motorcyclists with an effective means of protecting their bikes against theft and peace of mind for security-conscious individuals, particularly in areas known for criminal activity.

This invention eliminates the financial burden of repairing or replacing a stripped or stolen motorcycle and also spares the inconvenience and time associated with processing insurance claims and coordinating a rental. This durable and weatherproof device can also be adapted for use on other equipment such as a motorcycle, ATV, boat on a trailer, scooter, moped and more.

The original design was submitted to the Dallas office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-DLL-3267, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
