

Invention Vacuums Vehicle Interiors More Efficiently (KOC-557)

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the Tight Spot Cleaner, to applicable companies for their consideration.

PITTSBURGH ([PRWEB](#)) November 15, 2017 -- Cleaning the interior of a vehicle with a commercial vacuum cleaner can be difficult and frustrating because hard-to-reach spaces can't be cleaned properly due to the awkward shape and size of the hose head. "This inspired me to design a way to solve this problem," said an inventor from La Marque, Texas.

The Tight Spot Cleaner allows for easier and more efficient use of a commercial vacuum cleaner. It facilitates the cleaning of a vehicle interior by ensuring proper cleaning of hard-to-reach areas.

Designed to prevent struggle and hassle, and producible in design variations, the Tight Spot Cleaner is ideal for both vehicle owners and vehicle detailers.

The original design was submitted to the Canada office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-KOC-557, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
