

## **Protective Covering for Open Air Trailers Invented (MIS-284)**

*InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the Weather Shell, to applicable companies for their consideration.*

PITTSBURGH ([PRWEB](#)) November 16, 2017 -- An inventor from South St. Paul, Minn., has developed the WEATHER SHELL, a protective covering for supplies and equipment being carried or stored upon a trailer.

"I own a lawn care business but do not own an enclosed trailer. This can become a hassle due to the mess and damage caused by debris. As a solution to this, I developed a cover that protects my lawn equipment," said the inventor.

The WEATHER SHELL provides protection for equipment and supplies being transported via trailer. This will prevent costly damage and premature aging of equipment by intercepting bright sunlight, rain, hail, airborne dust, dirt and debris while parked or traveling. Ultimately, this will result in improved efficiency, safety and productivity for small businesses. This cover is ideally suited for landscapers, lawn care services, equipment haulers, car haulers and scrappers, as well as privately-owned trailers by campers.

The original design was submitted to the Minneapolis office of InventHelp. It is currently patent pending and available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-MIS-284, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
