

## **Invention Facilitates the Pumping of Gas**

*InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, The Grip to applicable companies for their consideration.*

PITTSBURGH ([PRWEB](#)) November 19, 2017 -- Having to grip the handle of a gas pump for long periods can be tedious and uncomfortable, especially during frigid weather. In order to streamline the process of pumping gas, an inventor from Kingsburg, Calif., came up with this idea and created a prototype for it. "While driving an RV, I had to fill up its 150-gallon gas tank, which takes 20 or more minutes to do, and the prototype came in handy," he said.

The patent-pending THE GRIP provides a more comfortable and convenient way to pump gas. It eliminates the need to grip a frigid or otherwise uncomfortable pump handle. As a result, it saves time and effort. Compact, portable, ergonomic and easy to use, THE GRIP also reduces contamination of the hands.

The original design was submitted to the Fresno office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-FRO-513, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
