

## **InventHelp Inventor Designs Safety System for Children/Pets Left Behind in Vehicles (PHO-2342)**

*InventHelp, a leading inventor service company, is working to submit CAR TEMP to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) November 20, 2017 -- If children or pets are forgotten in unintended vehicles, their health can be endangered, or even fatality can result. "In the interest of saving lives, I decided to develop reliable prevention of such a tragedy," said an inventor from Phoenix, Ariz.

The patent-pending CAR TEMP keeps temperatures in a vehicle interior from becoming too hot or too cold. It helps prevent serious injury or even fatality of a child or pet that has been left behind by accident. As a result, it promotes safety and peace of mind.

Reliable and easy to use, the system can be added to an existing vehicle or premanufactured in a new vehicle.

The original design was submitted to the Phoenix office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-PHO-2342, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
