

VEHICLE WATER DISPENSER Invented (LAX-894)

InventHelp, a leading inventor service company, is working to submit Vehicle Water Dispenser to companies for their review.

PITTSBURGH ([PRWEB](#)) November 21, 2017 -- “We thought there needed to be a better way to enjoy cool water while traveling in the car,” said one of two inventors, from Pasadena, Calif., “so we invented the VEHICLE WATER DISPENSER.”

The VEHICLE WATER DISPENSER provides an effective way to drink fresh water in a vehicle. In doing so, it offers an improved alternative to traditional coolers and water bottles. As a result, it saves time and effort and it eliminates the need to stop for water. The invention features a user-friendly design that is convenient and easy to use so it is ideal for vehicle owners. Additionally, the VEHICLE WATER DISPENSER is producible in design variations.

The inventors described the invention design. “Our design offers a convenient way to quench your thirst without stopping the car.”

The original design was submitted to the Los Angeles office of InventHelp. It is currently patent pending and available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-LAX-894, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
