

## Automotive Weather Shield Invented (NJD-1514)

*Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Rack Mounted Weather Guard, in the hopes of a good faith review.*

PITTSBURGH ([PRWEB](#)) November 21, 2017 -- Everyone knows there's no way to control the weather. However, an inventor from Basking Ridge, N.J. found a way to be prepared for the elements when stepping into or out of a car.

He developed RACK MOUNTED WEATHER GUARD to protect motorists from the elements in this type of situation. As such, it prevents weather damage to articles being loaded or unloaded and keeps users' hands free to load or unload children or items. At the same time, it eliminates the need for a conventional umbrella when entering or exiting a car in bad weather. Besides being safe, cost-efficient and easy to use, this unique invention is built to last. In addition, it is convenient, practical and affordably priced.

The inventor's personal needs inspired this concept. "This idea actually surfaced as a result of my own necessity and experience," he said, "since I had a difficult time juggling packages and children along with an umbrella when getting into and out of my car in the bad weather."

The original design was submitted to the New Jersey office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-NJD-1514, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
