

InventHelp Inventor Develops Personalized Automotive Rims (WDH-2055)

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, STAR FIRE RIMS in the hopes of a good faith review.

PITTSBURGH ([PRWEB](#)) November 21, 2017 -- An inventor from Hyattsville, Md., has developed the STAR FIRE RIMS, a set of specially designed automotive wheels with a very distinctive and eye-catching design.

"I created these designs out of curiosity on the microscopic structure of snowflakes. While caring for family members, I needed a stress reliever, so I embarked on designing these snowflakes," said the inventor. The patent-pending STAR FIRE RIMS enhance the overall appearance of an automobile or light truck. They accomplish this by personalizing a vehicle in a very interesting and appealing manner. They highlight the vehicle and clearly distinguish it amongst others. These rims will attract immediate attention and makes the owner proud.

The original design was submitted to the Washington, D.C. office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-WDH-2055, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
