

Invention Allows For Alternative Road Paving (JMC-2508)

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Quick Fix, in the hopes of a good faith review.

PITTSBURGH ([PRWEB](#)) November 22, 2017 -- An inventor from Lexington, Ky., wants to provide a better and long-lasting alternative way to pave roads, so he came up with the concept of the QUICK FIX.

This invention provides an alternative road-paving method that's better and long-lasting. It's also friendlier to the environment. Durable, versatile and producible in design variations, the QUICK FIX is ideal for both road-construction companies and DIYers (for driveways, for example).

The original design was submitted to the National Sales office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-JMC-2508, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
