

InventHelp Inventor Develops Signaling System for Motorcyclists

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the Motorcycle Signal Array to applicable companies for their consideration.

PITTSBURGH ([PRWEB](#)) November 30, 2017 -- "I was involved in a motorcycle accident. After some thought, I decided there was a way to motorcyclists more visible to other motorists," said an inventor from Land O Lakes, Fla. "I used my personal store of knowledge to come up with this safety system."

He created a prototype for the MOTORCYCLE SIGNAL ARRAY to enable a motorcyclist to convey their intentions to other drivers on the road. The system makes the motorcyclist more visible on the road. This ensures that other motorists can see the rider in order to avoid rear-end collisions and other accidents. It is designed to enhance highway safety for motorcyclists and other drivers alike. Furthermore, the invention is ideal for use in low-lighting or heavy traffic conditions.

The original design was submitted to the Oklahoma City office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-OLC-183, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
