

InventHelp Inventors Develop Enhanced Creeper for Mechanics

InventHelp, a leading inventor service company, is working to submit The Comfort Dolly to companies for their review.

PITTSBURGH ([PRWEB](#)) November 30, 2017 -- "I was working on the underside of a train table," said one of two inventors from Meadville, Pa. "It was then that I realized the personal need for a better design of creeper. We put our heads together and devised this more efficient version that conveniently adjusts."

They developed THE COMFORT DOLLY to provide a more comfortable way to work on the underside of a vehicle. The creeper adjusts to accommodate personal preferences. This allows for easier access, which helps improve on-the-job productivity. The device is designed for ease of use. In addition, the invention is producible in different sizes and colors.

The original design was submitted to the Pittsburgh office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-PIT-485, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
