

## **Inventhelp Inventor Develops Vehicle Playset**

*InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the Floating Magnet, to applicable companies for their consideration.*

PITTSBURGH ([PRWEB](#)) November 30, 2017 -- "I have never seen a floating car or truck. I learned about magnetism in school, and my son loves cars and trucks," said an inventor from Rochester, N.Y. "I married the two ideas to come up with this magnetic floating vehicle."

He created a prototype for the patent-pending FLOOTING MAGNET to serve as a floating vehicle. The playset does not require electricity or batteries for operation. It enables the individual to "drive" a floating vehicle around a track. The kit is designed to be educational, and it also offers hours of fun and entertainment. Additionally, it appeals to adults and children alike.

The original design was submitted to the Rochester office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-ROH-336, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
