

TRAFFIC CONTROL DEVICE Invented (SFO-463)

InventHelp, a leading inventor service company, is working to submit Traffic Control Device to companies for their review.

PITTSBURGH ([PRWEB](#)) November 30, 2017 -- “I thought there needed to be a safe and simple way to direct traffic around an accident,” said an inventor, from Livermore, Calif., “so I invented the TRAFFIC CONTROL DEVICE.”

The TRAFFIC CONTROL DEVICE provides an effective way to direct traffic around an accident or road hazard. In doing so, it offers an alternative to road flares. As a result, it enhances safety and it increases visibility. The invention features an environmentally-friendly design that is convenient and easy to use so it is ideal for emergency services. Additionally, the TRAFFIC CONTROL DEVICE is producible in design variations. It is a safer and more efficient way to deploy flares/control traffic.

The inventor described the invention design. “My design eliminates the need to burn road flares.”

The original design was submitted to the San Francisco office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-SFO-463, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
