

Car Door Cover for Dog Owners Invented by InventHelp Inventor

InventHelp, a leading inventor service company, is working to submit Dogs Travel Buddy for Cars to companies for their review.

PITTSBURGH ([PRWEB](#)) December 01, 2017 -- Most dog owners enjoy having their pets travel with them by car as long as the animals do not damage the car. Fortunately, an inventor from Simi Valley, Calif., has found a way to keep those road trips pleasant for the travelers with no wear and tear on the car.

She developed DOGS TRAVEL BUDDY FOR CARS to protect car doors against scratches and other damage from a dog's claws. At the same time, it provides a slip proof surface for a dog looking out a car window in the event of a sudden stop. Furthermore, it is easy to install and remove but remains securely in place. Besides that, it is durable for years of effective use. This unique invention is also convenient, practical and affordably priced. In addition, it is not visible from outside the car so it doesn't adversely affect the outside appearance of the car.

The inventor's personal experience inspired the idea. "When my dogs ride in the car, they jump up on the door to stick their heads out the window," she said. "As a result, their nails tear up the leather covering on the inside of the door."

The original design was submitted to the Los Angeles 2 office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers.
