

## **InventHelp Client's Invention Allows For Safer Use of Cruise Control (TOR-3951)**

*InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the SAFER CRUISE CONTROL to applicable companies for their consideration.*

PITTSBURGH ([PRWEB](#)) December 02, 2017 -- Due to his personal experience of driving long distances, an inventor from Ajax, Ontario, Canada, knows how frustrating it can be when other drivers don't realize that you're using cruise control. The aggressive driving in response to this can cause injurious, fatal and/or damaging accidents, so he decided to develop something that solves the problem.

The SAFER CRUISE CONTROL allows for safer and less confusing use of cruise control on a highway. It eliminates the ignorance of other drivers and deters them from driving too aggressively, which helps prevent accidents that result in injury, fatality and/or damage.

Featuring an easy-to-use design that's compatible with all vehicles, the SAFER CRUISE CONTROL promotes convenience and peace of mind for all drivers.

The original design was submitted to the Toronto office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-TOR-9751, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
