

InventHelp Inventor Develops EASY GO TRAILER (NJD-1430)

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, the EASY GO TRAILER to applicable companies for their consideration.

PITTSBURGH ([PRWEB](#)) December 05, 2017 -- An inventor, from Dunellen, N.J., thought there needed to be a more efficient way to move a storage container with a trailer, so he invented the patent-pending EASY GO TRAILER.

The EASY GO TRAILER provides a more effective way to transport locking storage containers. In doing so, it offers an improved alternative to traditional trailers. As a result, it increases efficiency and it eliminates the need to keep a trailer at a worksite. The invention features a versatile design that is convenient and easy to use so it is ideal for construction companies and contractors. Additionally, the EASY GO TRAILER is producible in design variations.

The inventor described the invention design. “My design allows a trailer to easily deliver and drop off a storage container and leave with a flat trailer and go to other desired locations, and of pickup of other storage containers.”

The original design was submitted to the New Jersey office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-NJD-1430, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
