

InventHelp Inventor Develops Device to Allow Police Officers to Clear Road Obstructions More Safely

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Safety Clear, in the hopes of a good faith review.

PITTSBURGH, PA ([PRWEB](#)) December 12, 2017 -- Debris or obstructions in lanes of travel on public highways (items fallen from large trucks, unsecured dunnage, dead deer or other roadkill) pose immediate danger to motorists. This requires many police officers to get out of their cars to clear away such obstructions, which makes them vulnerable to harm or fatality due to being struck by other vehicles. "My design solves this problem," said an inventor from West Alexander, Pa.

The patent-pending SAFETY CLEAR enables police officers to clear road debris and hazardous obstructions in a safer manner and without the need to get out of their vehicles. It helps to protect them from being struck by traffic. As a result, it may avoid injuries and fatalities. Additionally, it has an emergency-jettison function.

Ergonomic, easy to use and producible in different sizes, colors and designs, the SAFETY CLEAR promotes efficiency and peace of mind for all police officers, other public-safety personnel and the Department of Transportation.

The original design was submitted to the Pittsburgh office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-PIT-609, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
