

Inventor Develops Device to Make Routine Traffic Stops Safer (NJD-1549)

InventHelp, a leading inventor service company, is working to submit My I.D. to companies for their review.

PITTSBURGH ([PRWEB](#)) December 13, 2017 -- "I have spent 30 years in professional law enforcement," said an inventor from Parlin, N.J. "I recognized the need for safer interactions with the public during routine traffic stops. That is what inspired me to develop this convenient accessory."

He developed the MY I.D. to provide a more convenient way to display the requisite documentation needed during a traffic stop by police. The unit stores and organizes a driver's license, vehicle registration, insurance card, etc. It enables the police officer to access these documents in a safer, more efficient manner. The accessory saves the driver from having to fumble around in the glove compartment to retrieve needed information. This reduces stress during a routine traffic stop for both the officer and stopped motorist. Additionally, the invention offers added peace of mind.

The original design was submitted to the New Jersey office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-NJD-1549, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
