

InventHelp Inventor Develops Vehicle Covering for Hailstorms

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Hail-No Portal, in the hopes of a good faith review.

PITTSBURGH ([PRWEB](#)) December 14, 2017 -- "Living in Colorado, I have personally had vehicles that were damaged in hailstorms," said an inventor from Black Hawk, Colo. "In order to safeguard my vehicle while it was parked outdoors in a hailstorm, I came up with this energy-absorbing, protective cover."

He developed the patent-pending HAIL-NO PORTAL to protect the vehicle from damages caused by hailstones. The cover prevents hailstones from denting the body, breaking glass or scratching the paint. This reduces the need for repairs following a hailstorm. The invention offers added peace of mind when a vehicle is parked outdoors and hailstorms are forecast. It is designed to be quick and easy to set up and take down. Furthermore, the cover also blocks sunlight to protect the paint and keep the interior cool and comfortable.

The original design was submitted to the Denver office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-DPH-197, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
