

Inventor Develops Enhanced Key Fob for Automobiles (CHA-115)

InventHelp, a leading inventor service company, is working to submit Smart Fob to companies for their review.

PITTSBURGH, Pa. ([PRWEB](#)) December 14, 2017 -- "Key fobs are expensive, so I do not want to lose one and end up having to replace it," said an inventor from Sauk Village, Ill. "I would also like to know if my car alarm is going off, and I am not close enough to hear it. For these reasons, I came up with this enhanced key fob."

He developed the SMART FOB to be easy to locate if lost or misplaced. This keeps the fob from being forgotten or left behind. It also saves the user from having to purchase pricey replacement key fobs. The fob also alerts the owner if the vehicle's alarm system is tripped. It is adaptable for use with both new and existing vehicles. Additionally, the invention provides added peace of mind.

The original design was submitted to the Chicago office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-CHA-115, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
