

## **Inventor Develops Enhanced Line of Automotive Filters (SOG-103)**

*InventHelp, a leading inventor service company, is working to submit Magnet Guard to companies for their review.*

PITTSBURGH ([PRWEB](#)) December 06, 2017 -- "I wanted to prevent metallic residue from clogging up my engine oil, fuel system and air intake," said an inventor from Fort Bragg, Calif. "For this reason, I developed an enhanced line of filters that protect oil, air and fuel from contamination."

He created a prototype for the MAGNET GUARD to safeguard the engine oil, fuel system and air intake. The filters keep metallic bits out of these vehicle components. They ensure that the vehicle continues to run smoothly and efficiently. The filters protect sensitive components from harm. They reduce the frequency with which the vehicle must be serviced or repaired. Furthermore, the filters provide added peace of mind to motorists.

The original design was submitted to the Sacramento office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-SOG-103, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
