

## **Invention Allows for More Convenient and Safer Use of School Buses (NNY-2994)**

*InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, Kid Alert, to applicable companies for their consideration.*

PITTSBURGH ([PRWEB](#)) December 07, 2017 -- Many children have to wait outdoors for long periods while waiting for school buses to arrive at their stops. This leaves them exposed to inclement weather and may lure potential abductors. Also, if the bus arrives unexpectedly, they might miss their rides to school. "In order to solve these common problems, I came up with this idea," said a concerned inventor from Jamaica, N.Y.

The KID ALERT makes taking a school bus more convenient. It eliminates the need for long exposure to inclement weather. It also helps prevent abductions, which promotes safety. In addition, it avoids missed rides to school.

Featuring an easy-to-use design, and producible in design variations and different versions, the KID ALERT is designed to promote comfort and peace of mind.

The original design was submitted to the New York office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-NNY-2994, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
