

Inventor Develops Vehicle Covering for Hailstorms (DLL-3259)

InventHelp, founded in 1984 in Pittsburgh, is attempting to submit this idea, Hail Arrester, to applicable companies for their consideration.

PITTSBURGH ([PRWEB](#)) December 07, 2017 -- "My daughter had her car damaged from a hailstorm because it would not fit in her garage because her husband's was already there," said an inventor from Plano, Texas. "For this reason, I came up with a covering that safeguards a vehicle parked outdoors in a hailstorm."

He developed the HAIL ARRESTER to protect the entire vehicle against damages caused by hailstones. This prevents dents, dings and scratches, which reduces the need for vehicle repairs following hailstorms. The cover is ideal for use by motorists who park their vehicles outdoors. It is okay for occupants, who prefer to be in their car, while the device is in use. The device offers added peace of mind. Additionally, the invention is adaptable for use with new and existing vehicles.

The original design was submitted to the Dallas office of InventHelp. It is currently patent pending and available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-DLL-3259, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
