

THE ED BED Eases Hauling of Long Loads (PIT-603)

InventHelp, a leading invention company, would like to submit the Ed Bed to companies for a good-faith review.

PITTSBURGH ([PRWEB](#)) December 08, 2017 -- Trucks with smaller beds are inconvenient when long loads need to be hauled, and this can get in the way of efficiency and productivity. In order to solve this problem, an inventor from Rochester, Pa., conceived of the patent-pending THE ED BED.

This improved truck bed eases the hauling long loads in a truck with a smaller bed. It avoids inconvenience and inefficiency. It also eliminates the need to find, purchase or use another truck, as well as improves safety of hauling 8-foot loads due to the tailgate being closed. Overall, it saves time, effort and money.

Versatile, ergonomic, durable and featuring an easy-to-use design, THE ED BED is ideal for contractors and DIYers.

The original design was submitted to the Pittsburgh office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-PIT-603, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
