

## **InventHelp Inventor Develops Safety Sign For Disabled Vehicles**

*Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Safe Buddy in the hopes of a good faith review.*

PITTSBURGH, Pa. ([PRWEB](#)) December 16, 2017 -- An inventor from Decatur, Ga., has developed the SAFE BUDDY, a device for alerting approaching motorists of a disabled vehicle stopped along the roadside.

"Being in the trucking industry, I witness many dangerous scenarios on the roadside that have potential tragic outcomes," said the inventor. The SAFE BUDDY alerts motorists of a disabled vehicle on the roadside. It helps prevent a collision with a disabled car and/or stopped motorist. In turn, this will help prevent serious vehicular damage and possible injuries and fatalities. This safety device will prove to be especially helpful to truckers and other professional drivers.

The original design was submitted to the Atlanta office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-ALL-1133, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
