

InventHelp Inventor Develops Effective Way to Remove Snow and Ice From Driveways

Pittsburgh-based InventHelp, a leading inventor service company, is submitting this client's idea, Snowbuster, in the hopes of a good faith review.

PITTSBURGH ([PRWEB](#)) December 17, 2017 -- "I thought there needed to be a better way to handle accumulations of snow and ice on driveways and sidewalks," said an inventor, from Westerville, Ohio, "so I invented the SNOWBUSTER."

The patent-pending SNOWBUSTER provides an effective way to remove snow and ice from driveways and sidewalks. In doing so, it eliminates the need to manually remove snow and ice and it eliminates the need to use snow melting chemicals. As a result, it enhances safety. The invention features a practical design that is convenient and easy to use so it is ideal for households and businesses.

The inventor described the invention design. "My design offers an improved alternative to shoveling and scraping."

The original design was submitted to the Columbus office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 16-CLM-330, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
