One of the best methods used by drivers to pay lower car insurance rates is to shop around and compare prices. And the fastest and easiest way to do that is by comparing online car insurance quotes.

Drivers that want to obtain the best online quotes should follow the next tips:

- Look for the state's minimum insurance requirements. Each state has different minimum liability insurance requirements. In some states, drivers will have to buy additional coverage, such as PIP insurance or Uninsured/Underinsured Motorist coverage, in order to meet the state's minimum requirements. Before making any insurance purchase, drivers should do research and see what are the minimum requirements.
- Use accurate info. To obtain accurate quotes, drivers will need to complete the online questionnaire with accurate info about themselves, about their vehicles, and about their driving records. Drivers should pay attention to the safety and anti-theft devices that are installed in their vehicles. These devices can help them get a discount.
- Determine the coverage needs. Besides the state's minimum required insurance, drivers can choose other coverages that might find them useful. Comprehensive, collision, gap insurance, new vehicle replacement insurance, and others will provide additional protection, but they will also increase the costs of insurance.
- Obtain quotes. After they have decided what coverage they need, drivers should go online and obtain quotes. They can go to the websites of top insurance providers, or they can go to a brokerage website. Brokerage websites are ideal for drivers that want to obtain multiple quotes from various insurance providers.
- Use complex questionnaires. Drivers that want to obtain the best quotes should use complex questionnaires that have three categories, such as car information, driver information, and policy information. Make sure to keep all the relevant documents nearby. Usually, these questionnaires will be interested in the vehicle's specifics and its value, driving experience, mileage, and additional safety devices.
