

**Employee Related Cost Savings Programs for Employers in the Transportation Industry. Targeted areas of savings include workers compensation insurance, human resource consulting, and employee benefits.**

*STK Consulting Ltd was started by former trucking company owner Bill Burfield to assist clients in cost containment. Various programs are researched to fit the needs of the client. A no down payment workers comp program with affordable rates unique to the industry. A careful review of your existing plan to review different avenues for implementation.*

([PRWEB](#)) April 29, 2004 --Bill Burfield is a former trucking company owner with hands on experience who has seen both sides of truck ownership. After 12 years with a employee leasing company as Vice President of National Sales he has helped many clients review all the programs available to them in the areas of workers comp insurance, human resource outsourcing, employee benefits and audits on existing workers comp policies for inconsistencies which may lead to a rebate. When you deal with STK all actual work is done by Bill himself because of his experience. With a current client base in Illinois, Indiana, Mississippi, Louisiana, and Missouri he does not restrict himself to one specific region. His programs allow clients to focus on profit making areas of their company while employee matters can be cost contained. A recent client commented " I saved \$70,000 per year and also found some areas of my employee handbook which were not current with the new federal regulations"
