

## **Clear Task Solutions Receives Endorsement from Matt Manero, President of Commercial Fleet Financing, Inc., Host of the “Driving Success” Podcast, and Author of “The Grit”**

*Matt Manero endorses Clear Task Solutions, a cloud-based field management software and App, on his podcast, “Driving Success” podcast. Matt described Clear Task Solutions as “The App does a number of different things. It does dispatch. It does GPS and mapping. It does real-time uploads to track the latest results of the job. It issues time cards. It’s crew management. It’s basically this one-stop-shop for everything that happens within the job, both for trucking and construction.”*

OREM, Utah ([PRWEB](#)) January 02, 2020 -- Clear Task Solutions, a [cloud-based field management software](#) and App, received a top endorsement from [Matt Manero](#) on the “Driving Success” video podcast. Manero is President of Commercial Fleet Financing, Inc., a \$160 Million dollars in annual revenue business. During a recent episode of “Driving Success”, Matt described Clear Task Solutions as “The App does a number of different things. It does dispatch. It does GPS and mapping. It does real-time uploads to track the latest results of the job. It issues time cards. It’s crew management. It’s basically this one-stop-shop for everything that happens within the job, both for trucking and construction.”

Matt went on to endorse CTS saying, “It was built by Dan Poulsen who has 20 years of experience running dump trucks for construction sites. This is real boots on the ground software that was built by someone who uses it... We support Clear Task Solutions in this adventure, and venture...and their hub that solves this huge problem of centralizing communication in the transportation industry.”

Clear Task Solutions is owned by Dan Poulsen, who also runs a 7-figure in revenue dump truck business he started 26 years ago, at the age of 17. “After years of doing things the hard way, working 12-hour days, always dealing with this or that problem in my business, hardly ever having quality time with my family, I just had to figure out a better way. With developments in technology I figured there had to be a tool or software out there that could help.” Not finding a solution that Dan felt truly met all the needs of his businesses, he determined to develop the solution he wished he could find himself.

“At Clear Task, we’ve created a cloud-based software and mobile App that helps labor-driven businesses simplify their dispatching, automate time reporting, and create accountability. It’s super easy to use. And the best part, we’re able to help business owners get their life back, just like I got mine back. Now, they can go to their kid’s baseball game, dance recital, or take a vacation without having to pick up their phone to deal with business problems, because those problems have been eliminated with our [field management software](#).”

With Clear Task Solutions, businesses can schedule and manage jobs, dispatch jobs to crew members, see when a crew member has accepted a job, or rejected it and why. See when each crew member clocks in and out, and their Geo location when they clocked in/out and see real time job alerts updating on progress. Crews can accept a job, see job details, required materials, where and when to pick up items required for the job, job directions with a Google Maps integration, clock in/out, take and attach pictures of job progress, mark a job as complete, all from the Clear Task Field App.

Clear Task Solutions is a Cloud-based field management software that simplifies dispatching, automates time

tracking and reporting, and creates accountability. For more information visit CTS's website at [www.ClearTaskSolutions.com](http://www.ClearTaskSolutions.com), call (385) 625-6884, or email [info@cleartasksolutions.com](mailto:info@cleartasksolutions.com).
