

Autoscope, the Texas Leader in European Car Care, is proud to present its newly renovated facility in Plano

Autoscope European Car Care, providing high-end European car service, has completed renovations of its service and repair facility in Plano, Texas.

PLANO, Texas ([PRWEB](#)) January 08, 2020 -- Autoscope, the Texas Leader in European Car Care, is proud to present its newly renovated facility in Plano.

Autoscope European Car Care, providing [high-end European car service](#), has completed renovations of its service and repair facility on Coit Road, just north of the George Bush Freeway in Plano, Texas. The 10,000 square foot building was initially opened in 1993. The shop, customer and office facilities have been given a new look. [Autoscope Plano](#) remained open for business throughout the months of renovation.

Utilizing an open plan, new customer and office spaces provide views into the shop. Lounge areas provide comfortable places for customers to kick back while having their cars serviced. There is a new customer bar and pantry area and an enclosed space for quiet reading or computer work. "Windows-to-the-Shop" features have been replicated from Autoscope's Park Cities location. These glass walls provide direct views into the inner workings of the shop. Customers can now see how cleanly and efficiently their car servicing is being performed at any moment.

Post servicing, customers can walk into a new service bay, located just outside the service advisor area. This bay will be used for car delivery, "show and tell" presentations, and detailing. All of these mindful changes were designed to deliver the first-class service experience that our clients deserve.

The synchronized release of Autoscope's new website <https://www.autoscopecarcare.com> which includes features such as an [online scheduling link](#), will simplify the lives of Autoscope's busy customers.
