Otarris Launches New, Low Cost In-Vehicle Connectivity Solution for the Taxi Industry

Otarris TaxiConnect Pro™ gives taxi fleets across the country a new, affordable way to have complete control over their in-vehicle wireless connectivity plans.

MCLEAN, Va. (PRWEB) January 15, 2020 -- Otarris, a division of Kajeet, Inc., has launched a new end-to-end in-vehicle connectivity solution, TaxiConnect Pro, for taxi fleets nationwide. The solution offers wireless data plans on all five of the nation's major network carriers and allows taxi companies have complete control over their data usage and entire fleet's connectivity though Kajeet's cloud-based Sentinel® platform.

"In today's highly competitive environment, taxi companies are always looking for ways to get a leg up on the competition and save money on their wireless programs," says Daniel Neal, CEO of Kajeet, Inc. "TaxiConnect Pro not only allows taxi companies to witness substantial savings on their monthly data plans, it also enables them to elevate their quality of service. With TaxiConnect Pro, dispatch teams and drivers are seamlessly coordinated, onboard electronic payment systems are more reliable and secure, and fleet management software is easily activated and deployed."

TaxiConnect Pro will be offered on the Sentinel platform, which comes with content filtering, device management, network security and reporting tools, all of which can be customized to optimize bandwidth, reduce costs, and eliminate waste and fraud.

"Sentinel is extremely valuable for giving companies control over the many connected devices within their network, especially as the Internet of Things (IoT) continues to grow," says Neal. "Taxi companies can keep track of and control their data usage regardless of their vehicle's location anywhere in the country. As their fleet or list of devices grows, managing their connectivity landscape will become even more critical."

In addition to wireless data plans and a cloud-based management platform, TaxiConnect Pro's in-vehicle connectivity solution also includes rugged tablets or hotspots.

In-vehicle connectivity is the first in a series of taxi-specific digital transformation solutions that Otarris plans to unveil in the coming months.

About Otarris and Kajeet

Otarris™, a division of Kajeet®, Inc., is the industry leader for highly-managed multi-network mobile solutions, and for deploying private wireless networks across multiple industry verticals. Our secure, cloud-based SaaS platform, Sentinel®, allows our clients to centrally manage network security and filtering; policy, device and network controls; data consumption rates; business analytics; and allows for operation on all 6 major north American wireless networks. Kajeet products and services are protected by the following issued U.S. patents: 10,313,532; 10,285,025; 10,057,300; 10,009,480; 9,237,433; 9,137,389; 9,137,386; 9,125,057; 8,995,952; 8,929,857; 8,918,080; 8,774,755; 8,774,754; 8,755,768; 8,731,517; 8,725,109; 8,712,371; 8,706,079; 8,667,559; 8,644,796; 8,639,216; 8,634,803; 8,634,802; 8,634,801; 8,630,612; 8,611,885; 8,600,348; 8,594,619; 8,588,735; 8,285,249; 8,078,140; 7,945,238; 7,899,438; 7,881,697.
