

LoadandTow.com to Target Pest Control Companies With the Highly Successful SuperSprings Product

LoadandTow.com is an authorized SuperSprings dealer on the web that offers a comprehensive service to it's customers including personal contact when requested. The SuperSprings product has proved itself to be highly effective in the pest control industry.

[\(PRWEB\)](#) February 18, 2005 -- LoadandTow.com is pleased to announce it's relationship with SuperSprings Inc. LoadandTow.com now offers the most comprehensive online store for this product as well as a commitment to back the sale with a personal touch. Owner Steve Bartleet will be on call to take product questions and to assist with any technical issues. This will make LoadandTow unique in online sales.

SuperSprings has been involved in the pest control industry for some time now having established a relationship with Home Team last March. Home Team is one of the largest pest control companies in the United States and is constantly updating it fleet and equipment.

As with most pest control companies, up fitment is required on light duty trucks resulting in stresses on existing suspension, shocks and tires. "When the trucks are bought they are fine" says Steve, "but once the customer adds a water tank, pump, hoses and tools, the rear sags and sways, causing all sorts of safety issues". Field tests determine that the SuperSprings medium duty springs provides the necessary enhancement to the majority of the compact pickups while the SuperSprings heavy duty models accommodate the half ton and three-quarter ton models.

SuperSprings is a self adjusting suspension stabilizer that gives users extra load capacity, reduces rear end roll, improves safety and reduces the wear on brakes, tires, shocks and suspension. Working in parallel with the vehicle's suspension system, SuperSprings attach onto the existing rear springs and "kick in" only when needed like when loaded, cornering, or towing. SuperSprings improve the safety by improving the handling substantially when in an emergency situation.

SuperSprings are easy to instal, require no drilling, cutting or modification to your truck and once they are installed, no maintenance or adjustments are required...just "fit it and forget it". SuperSprings are also covered by a lifetime warranty.

About LoadandTow

LoadandTow was established by Steve Bartleet in July 2004 to provide an online service to the pickup truck market. SuperSprings in the first product to be placed on the site but will be followed by other prestigious products like DiamondBack truck covers and Putnam tow hitches. Steve takes pride in the fact that he provides a toll free number where shoppers can contact him personally with any questions or problems they may have. This level of service is unique in the industry.
