

Merconnet.com Kicks off Spring With New Products

Watch DVD movies while travelling in long car trips and keep the kids entertained...

MONTREAL, QUEBEC ([PRWEB](#)) May 6, 2004 -- If you've ever been in a situation where you wanted to watch DVDs on a small portable LCD screen - at the cottage, on your boat, in your car while stuck in traffic - you've probably wished you had the thousands of dollars it costs for those kinds of gadgets. Thanks to Merconnet.com (<http://www.merconnet.com>), you can have the same experience for about \$500 (US). Merconnet is offering a number of packages that include a portable DVD player and an LCD screen, including some that offer LCD screens designed to be mounted in a vehicle.

Merconnet (www.merconnet.com) introduces the 7" TFT/LCD Monitor with TV tuner with car cigarette lighter adapter, designed for automotive entertainment and TV/display applications. The monitor can be coupled with a portable DVD player such as the NextBase 4, the fourth and newest generation of portable DVD player, for a great entertainment combination. The NextBase 4 comes equipped with a built in Dolby Digital Decoder that will allow you to bring sound quality to higher levels.

The 7 " LCD monitor can also act as a TV receiver, a LCD that displays sharp color images with a screen size of 7 inches. It has a high luminance fluorescent light as a back light, including connection terminals for an earphone jack and an external power jack. The monitor has an auto-flip function that automatically flips the image when the screen is placed upside down! It comes with an AC-DC power adapter to be run at home, or a car adapter to be powered through the cigarette lighter. It is priced at \$219.00 (US).

The NextBase 4 is a handy DVD player with top loading loader that plays DVD/CD/CD-R/CD-RW/MP3/JPEG pictures. It has a built-in Dolby digital (AC-3) decoder with a R/L 2 channel composite audio output and an earphone output with volume control. But one of the best features of the NextBase 4 is the multi region disk support, being able to play DVDs of various types.
