

## **Merconnet Kicks off spring with an Exciting Product**

*Play your iPod or your PDA in the car using the car FM stereo.*

MONTREAL, QUEBEC ([PRWEB](#)) May 6, 2004 -- Has there been a time when you were listening to your portable CD/MP3 player and your friend wanted to listen? It is a pain to be switching back a forth between both of you. Most of us do not have portable CD/MP3 players, but almost everyone one of us has a FM stereo lying around. How can the FM stereo help? Well Digiana has a Wireless audio portable FM linker.

Merconnet ([www.merconnet.com](http://www.merconnet.com)) introduces the Audia X Digiana where it allows you to play audio files from any PDA, portable MP3 Player, a portable CD player or even a portable DVD player through a car stereo or any FM stereo. What this device does is link any portable audio device with a FM frequency, without needing extra wires, or expensive electronics.

The Audia X Digiana has available channel selection up (1 or 0.1MHz) ; FM Band Full Channels (88.0-108.0 MHz) available also. You can get excellent sound by wireless solution, and a LCD Display with a back light lamp. With a 1.5V AAA battery, you can get a maximum of 8 hours run time.

About Merconnet.com
