

New Clock & Thermometer Range from Pro-Street Cycles

Pro-Street Cycles are pleased to announce that they have now further extended their range of billet clocks and thermometers to now include models for the Harley Davidson® V-Rod® VRSCA and VRSCB models and the Road King® and Road King Classic® models.

([PRWEB](#)) July 21, 2005 -- Pro-Street Cycles are pleased to announce that they have now further extended their range of billet clocks and thermometers to now include models for the Harley Davidson® V-Rod® VRSCA and VRSCB models and the Road King® and Road King Classic® models.

The V-Rod® clock fits over the stem nut and is tightened with a small set screw using a hex wrench (which is supplied). The set screw is well-hidden, which makes for a clean mounting after the unit is installed.

The latest creation from the team at Pro-Street Cycles takes another eyesore, the Road King console washer, and replaces it with a beautiful add-on that is functional as well. The billet housing is positioned perfectly to glance at while riding and it looks so good, it looks as though the Motor Company put it there themselves! Our Console Clock also replaces the Motor Company's own after market answer to the ugly OEM arrangement...the "Bullseye" Console Washer - p/n 94753-99.

All our housings are CNC machined from 6061-T6 billet aluminium and then given a high mirror polish. Each housing incorporates either a water-proof quartz clock or thermometer. Precision-crafted by Pro-Street Cycles in Germany.

All clocks feature Luminescent hands and dials and have a "soft gasket" mounting system that helps insulate against the damaging effects of vibration. The clocks feature a metal case and special gasket that seals the lens and protects the movement from being damaged by water. Clocks are triple plated for durability and incorporate scratch resistant glass lens.

The clocks and thermometers are available with a choice of combination styles - Black Face/Chrome Bezel or White Face/Chrome Bezel.

Attractively packaged and fully guaranteed.

Pro-Street Cycles now produce a range of motorcycle clocks and thermometers which are available to fit most makes of motorcycle including Harley®, Honda, Kawasaki, Suzuki, Yamaha, Triumph etc. The time for putting your glove down and your sleeve up just to have a look at your watch is over.

The Pro-Street range of Billet motorcycle clocks is a part of our own range of dynamic billet accessories. For more details visit Pro-Street Cycles at <http://www.pro-streetcycles.com>
